My logo represents a hive, and young people represents the bees. In the hive the bees help each other, as all young people should do, help others and live in harmony.

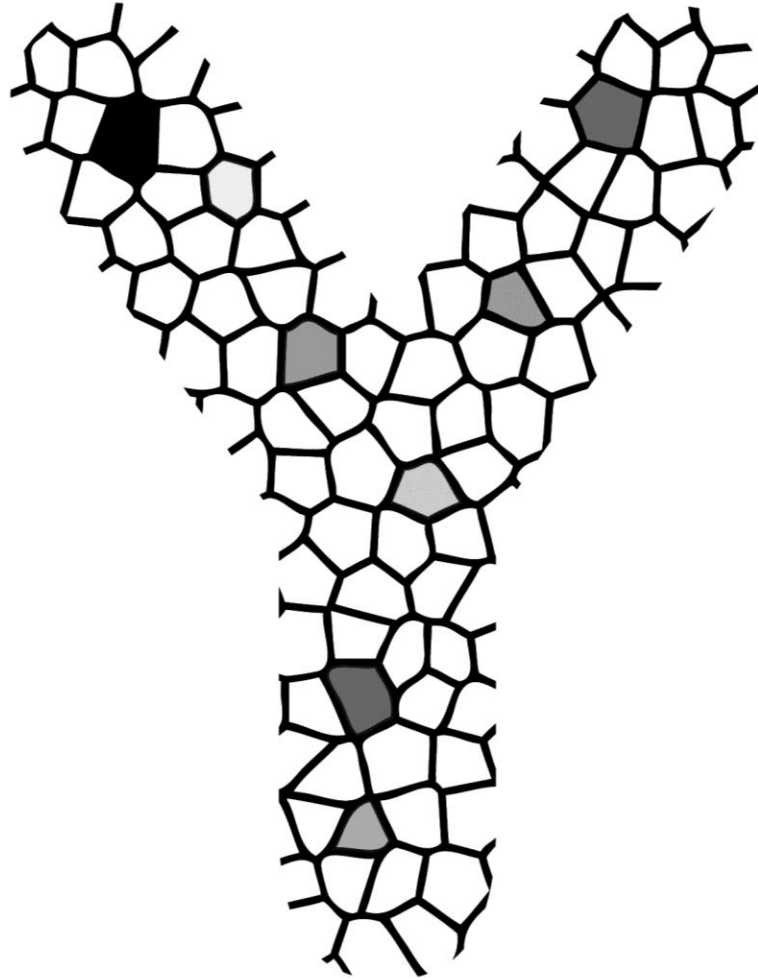

The logo is colorful, the color represents the fun that young people should be able to, however I think the fun should live balanced with the responsibility. Was why I designed a logo that conveys joy.

With the current global crisis I think all young people should prepare themselves for hard times, but I also think that they should never give up their dreams. So I hope somehow, with my logo convey good ideas to all young people.

This logo is represented by two heart-shaped comic book balloons to portrait the unity among all young people in Europe. These balloons symbolize the diversity of languages in Europe and also represent two young people speaking, expressing the diversity of young people from Europe and the dialogue and interaction between them.

The stars refer to the European Union flag, but also convey the eyes of two balloons to enhance a vision for the future and new opportunities in life.

The logo colors (the same as in the European Union flag), and the typography as well, were chosen to transmit the simplicity and modernity of the youth.
